

A Communal Habit of Mind

Narration: **[00:01]** A communal habit of mind. Strive to help students regard themselves and their work as part of the civilization-wide effort to advance knowledge frontiers.

[00:13] Expertise and knowledge are exchanged within and between communities. Symmetrical knowledge advancement results from this give and take of knowledge. Knowledge building is a pervasive, continuous process of learning, both in and out of school. Rather than an activity relegated to particular occasions or subject areas.

[00:33] Exchange and share expertise among groups. Co-construct knowledge across teams. Transfer knowledge building way of thinking and acting, higher order thinking and social skills, in a collaborative manner to other subjects or situations in and out of school.
